

AOCR Competition

Meeting 01/23

Bo Han, Chen

National Yang Ming Chiao Tung University, Taiwan

bhchen312551074.cs12@nycu.edu.tw

January 23, 2024

- Preprocessing
 - CT scan with acute appendix
 - crop image to $256 \times 256 \times 25$
 - $ww = 400$, $wl = 40$
 - normalize image to $[0, 1]$

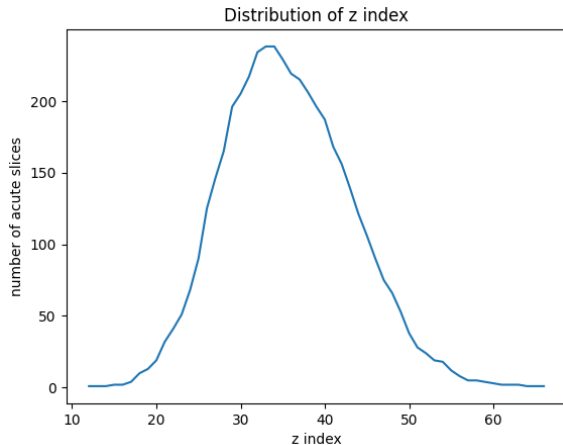

Figure 1: Acute Slice Distribution

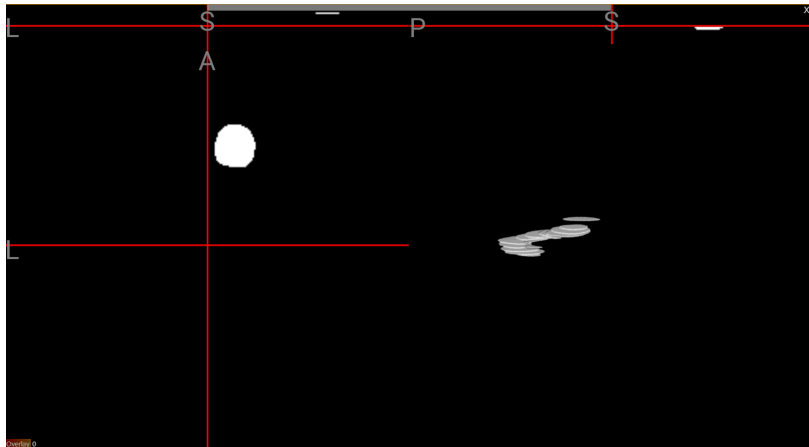

Figure 2: Segmentation Result - Acute

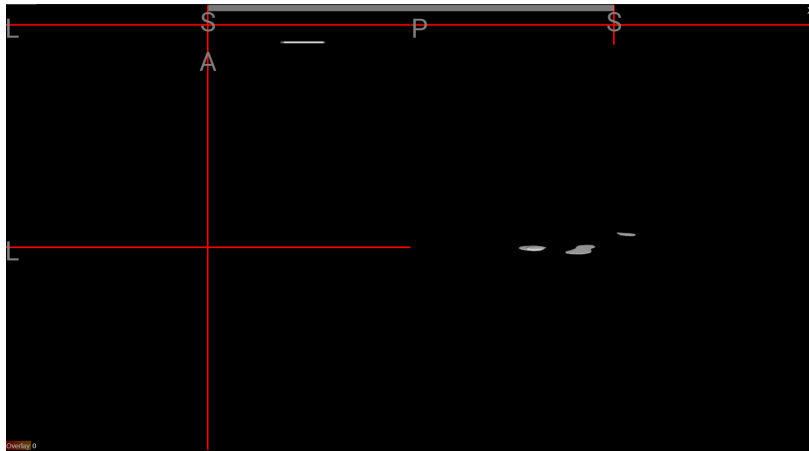

Figure 3: Segmentation Result - Not Acute

- able to segment acute appendix roughly
- how to improve the classification with segmentation result

Thanks for Listening

Q & A
